Hi Grofers Hiring Team,

How are you? I hope you guys are doing great.

I am a **MERN** Stack developer who loves to build and design optimal websites. Due to this, I love to keep track of all the latest front-end and back-end technologies. I was enrolled in a **Teaching Assistantship** (Full-Stack Development Course) for Coding Ninjas. At the end of it, I was the **top mentor**. I also have created a **proper working social media** site from scratch (<http://www.skyinyou.com>).

When I am not designing, then I have a **strong passion for coding**. My go-to programming language is JAVA but I am also equally comfortable with Python and C/C++. I have secured a 2861 **Overall Rank** on the GFG Platform with a Coding Score of 1063. I have completed my B. Tech (ECE) from VIT, Vellore, with a 9.23/10 CGPA in 2020. I was the recipient of a scholarship for my excellent academic performance for all 4 years.

I am currently working with Bank of America as a **Software Engineer**. In Feb'21, I was lauded with the **Bronze Medal-Internationally** for my team efforts. My present role is concerned with the UI development of applications using React.

This is my personal portfolio: www.thehindflora.com. You are welcome to explore it as it will give you an insight into my caliber.

Why Am I Applying?

I want to join Grofers as I am constantly revered by its mission. The inception of creating one profound platform for delivering essential necessities is quite exemplary. If I am given the opportunity to join this organization as an **SDE-Backend** then I will prove to be a beneficial asset. I will channel my dedication, my coding skills, and my expertise in web development for its amelioration.

Thank you for your time!

With best regards,
Manjari Jain
